#### **DETAILED ACTION**

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1732, Examiner Leo Tentoni.

#### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-19 and 22-43, drawn to a process of making a web or fiberfill, classified in class 264, subclass 103.

II. Claims 20 and 21, drawn to web or fiberfill, classified in class 442, subclass 352.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process such as a process including the step of crimping with a fluid jet (instead of mechanical crimping), or a process including the steps of cutting crimped filaments and then relaxing.

Art Unit: 1732

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. During a telephone conversation with Mark D. Kuller, applicant's representative, on 19 August 2003 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-19 and 22-43. Affirmation of this election must be made by applicant in replying to this Office action. Claims 20 and 21 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

#### ***Specification***

7. The abstract of the disclosure is objected to because in lines 1, 2, 4 and 5, ``comprising'' should be - - including - - (legal or claim-type phraseology should not be used in the abstract). Correction is required. See MPEP § 608.01(b).

8. Applicant is reminded of the proper language and format for an abstract of the disclosure.

Art Unit: 1732

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

9. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: PROCESS OF MAKING WEB OR FIBERFILL FROM POLYTRIMETHYLENE TEREPHTHALATE STAPLE FIBERS.

***Claim Rejections - 35 USC § 112***

10. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

11. Claims 8 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 8, line 1, the expression - - the group consisting of - - should be inserted after ``from'' (for proper Markush format).

Art Unit: 1732

**Allowable Subject Matter**

12. Claims 1-7, 10-19 and 22-43 are allowable over the prior art references presently of record.

13. Claims 8 and 9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

14. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art references presently of record, alone or in combination, disclose, suggest or teach a process of making a web or fiberfill from polytrimethylene terephthalate staple fibers including the steps of crimping drawn filaments in a mechanical crimper at a crimp level of 8-30 crimps per inch (3-12 crimps per centimeter), relaxing the crimped filaments at a temperature of 50-130°C and cutting the relaxed filaments into staple fibers having a length of about 0.2-6 inches (about 0.5-15 cm) as set forth in instant independent claims 1 and 14.
